Important Facts To Know Before You Buy

Dues assessments and Member Reimbursed Services (MRS) fees or other contributions are not tax-deductible. Tahoe Timber Trails Association incorporated in 1970 as a Mutual Benefit Corporation granted non-profit status as a 501(c)(7) social club. This status provides some tax relief and allows fundraising revenue to be used for the benefit of improvements and activities within the campground.

You are purchasing a Membership, not the land. Ownership of the Corporation is held by 553 Memberships representing one voting share (one vote per site). Members have access to common areas and amenities, activities and events, and exclusive unlimited use of the designated campsite. All campsite improvements must be pre-approved and adhere to the guidelines adopted by the Association.

Bylaw S14 - **Renting/Leasing Campsites: Renting, leasing or other commercialization of a campsite is prohibited.** However, members may allow the use of their campsite by their immediate family and their friends. Permission to use the campsite must be in writing and on file with the association office.

Each Membership campsite is assessed by Nevada County at the time of ownership transfer. TTT management is not involved in this process nor determination of the tax amount. Sellers and Buyers will need to separate the value of the site from any personal property being sold – Nevada County Tax Assessor will request purchase price of site for tax assessment purposes.

Motorcycles, motorbikes, e-motos, ATVs and similar type units such as gas-powered golf carts are prohibited. They may be stored on your site on a trailer or in the designated area determined by the Association. Electric golf carts and e-bikes are permitted and must be registered each year.
